

# Student Leadership

**Student Leadership** Students plan, execute and affect change by starting with their own campus, and rippling out to the larger community. Leadership opportunities are available for all students to help cultivate their real-world skills in this area. Students elected to serve on the Associated Student Body will help design student-driven activities and events. Students will serve as liaisons between their high school constituents and the school administration.

**Link Crew** is a leadership program offered to high schools Seniors and Juniors who are paired with Freshmen throughout the year. The Link Leaders help freshmen get involved with activities put on by the school and local communities. They also help to bridge the gap between freshmen and the rest of the school.

The leaders are a positive role model for the freshman students during the important transition from middle school to high school. Link Leaders are in charge of the activities during freshman orientation to help freshmen feel at home. Link Leaders continue to support their student Crew by meeting with them weekly, inviting them to school functions, and assisting them academically.
